

Automatic Audio System Shut-off

This application was made for turning the audio system off when it is not being used.

- Pressing **SYSTEM START** button turns on audio system for adjustable time period controlled by the TIMER.
- Audio from sound system will trigger the ST-ACR1 and reset the TIMER's cycle, keeping audio system turned on.
- When no audio is detected for duration of the TIMER's cycle, AC power to the sound system is turned off.
- Transistor prevents transients produced when sound system is powered down from restarting TIMER.
- The automatic shut-off system may be bypassed with the **MANUAL ON** switch.
